

My Beautiful Polynomial Art

You will create a Polynomial

Leading coefficient: + / -

Degree of polynomial:

End behavior:

Number of x-intercepts:

x=						
factor						
M						
(factor) ^M						

The Name of my Artwork AKA equation

$p(x) =$

You guess the name of your friends Polynomial Art

x=						
how it intersects the x-axis						
possible multiplicity, M						
(factor) ^M						

End behavior:

Leading coefficient: + / -

Possible degree of polynomial:

The Name of my Friends Artwork AKA equation:

$p(x) =$
